

Filling Auto Propane Tanks for Propane Vehicle Operators (CF02)

Course Summary

This course has been designed to train your employees or customers how to safely fill their propane vehicles at private filling centres, which are often managed by cardlock or keylock security. After completing the two lessons within this course, students will have an understanding of:

- What they need to know about propane;
- The key components and safety requirements of the propane filling centre equipment they will be using; and
- How to properly fill auto propane tanks.

Related Training Programs

This course has been designed for individuals who fill auto propane tanks. Other related courses in our Container Filling series of training include ***Filling Propane Cylinders at Retail Filling Centres (CF01)*** and ***Filling Propane Cylinders and Auto Propane Tanks at Retail Filling Centres (CF03)***.

The Learning Process

Our instructors are subject matter experts who will guide the student through the learning process. The Fuels Learning Centre recognizes that a fleet vehicle operator needs to get up and running as quickly as possible. Our flexible processes allow our Instructors to offer this training in either a classroom environment or through 1-on-1 training. Whether they learn in a classroom or a 1-on-1 session with their own vehicle, the real knowledge transfer occurs during the skills demonstration provided by a Fuels Learning Centre Instructor. Following the skills demonstration, the fleet operator will have the opportunity to practice the skills they have learned. To ensure they fully understand the curriculum, they must successfully complete a hands-on skills evaluation. There is no written exam for this course since our Instructors will ensure full understanding by asking a series of questions during the skills evaluation.

Filling Auto Propane Tanks for Propane Vehicle Operators (CF02)

Record of Training Certificate

Upon successful completion of the skills evaluation, your student will be issued a Record of Training (ROT) Certificate by the Instructor. Our ROT certificates are recognized by regulatory authorities across Canada and each certificate is customized to meet regulatory requirements of the province where your employee works. Our Instructors may complete the skills evaluation using a mobile device connected to our on-line learning management system, immediately triggering the release of the ROT certificate. ROT certificates issued by the Fuels Learning Centre are valid for 36 months following the successful completion of the skills evaluation.

Accessing our Training Curriculum

The Fuels Learning Centre offers its training through professional Instructors who have experience delivering curriculum related to filling auto propane tanks. If you have experienced internal trainers, we will work with you to provide access to our curriculum. Our process to authorize Instructors begins with our Instructor Application. There are no fees to become authorized to deliver Fuels Learning Centre training programs, however, our Instructors are bound to a comprehensive Code of Conduct. If you rely on a third-party instructors, ask them to contact us to gain authorization to deliver our training. We can also work with you to find an Instructor in your area.
