

## Transportation & Delivery of Propane Cylinders (T003)

### Course Summary

This course has been designed for cylinder delivery truck operators who load, secure, transport and deliver propane cylinders. After completing the five lessons within this course, your propane cylinder delivery truck operator will have an understanding of:

- What they need to know about the properties and characteristics of propane and the key requirements for transporting propane cylinders under TDG regulations;
- What they need to know about propane cylinders including the stamping on propane cylinders and the requalification requirements;
- What they need to know about personal protective equipment and how to correctly lift and move propane cylinders;
- What they need to know about load securement principles, how to properly load the cylinder delivery truck and the requirements for operating propane cylinder delivery trucks;
- The requirements for how propane cylinders are to be stored and protected at customer sites, based on the various types of propane cylinder storage areas; and
- What they need to know in relation to safety and emergency response planning.

### Related Training Programs

If your operation is also a Transport Canada requalification facility, then we recommend our course ***Visual Inspection & Requalification of Propane Cylinders (SO01)***.

### The Learning Process

Our instructors are subject matter experts who will guide the student through the learning process. Our flexible learning processes allow our Instructors to offer this training in either a classroom environment or through 1-on-1 training. Whether they learn in a classroom or a 1-on-1 session with their own vehicle, or a combination of both methods, the real knowledge transfer occurs during the skills demonstration, customized to your equipment, provided by a Fuels Learning Centre Instructor. Following the skills demonstration, your employee will have ample opportunity to practice the skills they have learned. To ensure they fully understand the curriculum, they must successfully complete both a written exam and a hands-on skills evaluation.

## Transportation & Delivery of Propane Cylinders (T003)

### Record of Training Certificate

Upon successful completion of the skills evaluation, your employee will be issued a Record of Training (ROT) Certificate by the Instructor. Our ROT certificates are recognized by regulatory authorities across Canada and each certificate is customized to meet regulatory requirements of the province where your employee works. Our Instructors may complete the skills evaluation using a mobile device connected to our on-line learning management system, immediately triggering the release of the ROT certificate. ROT certificates issued by the Fuels Learning Centre are valid for 36 months following the successful completion of the skills evaluation.

### Accessing our Training Curriculum

The Fuels Learning Centre offers its training through professional Instructors who have experience delivering curriculum related to the operation of cylinder delivery trucks. If you have experienced internal trainers, we will work with you to provide access to our curriculum. Our process to authorize Instructors begins with our Instructor Application. There are no fees to become authorized to deliver Fuels Learning Centre training programs, however, our Instructors are bound to a comprehensive Code of Conduct. If you rely on a third-party instructors, ask them to contact us to gain authorization to deliver our training. We can also work with you to find an Instructor in your area.
